

The EverSuite turnkey portal solution

ES-Portal is a series of intranet applications combining the implementation flexibility of a ready-to-use solution and the power of a content management infrastructure. ES-Portal includes the main functions needed to install your intranet and extranet portals.

Business challenges

Your company's intranet needs have expanded greatly - from a simple ergonomic interface providing a limited number of services to an application with much broader operational scope, and one that represents the entry point to your company's information system.

EverSuite Portal enables you to install your portal's main functions quickly, using a look and feel that your employees can customize according to their needs.

ES-Portal's added value

- Find all the functions you need to install your own portal in a single product
- Integrate your portal quickly and easily with your information system
- Customize your portal's interface easily
- Offer your users single access and authentication
- Make collaborative work easier
- Make your partners part of your information system
- Transmit and build on knowledge both inside and outside the company
- Increase productivity thanks to faster data access and flow
- Reduce your communication, printing and document transmission costs
- A 100% web-based solution for simplified rollout

Use ES-Portal for:

- Collaborative and knowledge management portals
- Informational portals
- Application portals
- Partner extranets
- Virtual desktops, etc.

Corporate portal

With the ready-to-use, multi-language and customizable **ES-Portal** solution:

- In a matter of days, configure your intranet according to the needs and profiles of your employees and your own graphic standards
- Manage your partner, supplier or customer extranets on a single server thanks to its "multi-portal" technology
- Use its native connectors to integrate your company's internal and external applications, including ERP, CRM, and decision-making tools
- Set up single sign-on for all applications in use

Your intranet thus becomes the entry point to your information system.

Content management

ES-Portal includes a series of data publication and retrieval tools: web editor, modification and approval cycle, publishing and automatic archiving according to pre-set dates, translation, dynamic categorization in knowledge trees, full text search engine, etc.

Collaborative work

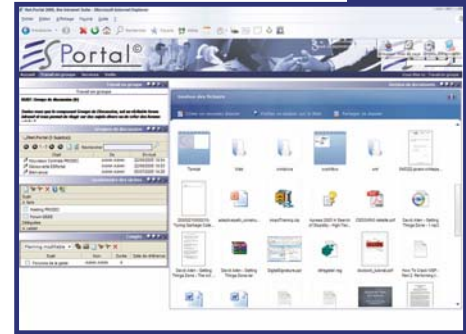

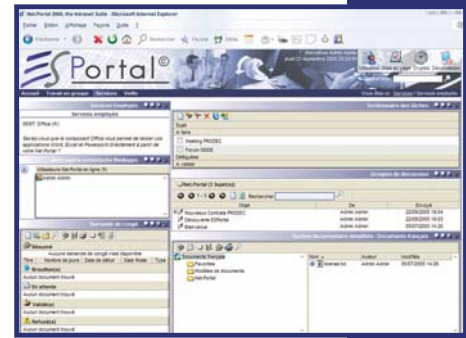

ES-Portal includes a set of tools for managing and optimizing projects: assignment of scheduled tasks, automatic input to the task management tool, management of national holidays and vacations, forums, wiki, etc.

Employee Services

ES-Portal includes a range of services to make your employees' lives easier and automate your processes: administrative document validation cycle, integration of MS Outlook email and calendar functions, access to MS Office applications, interactive surveys, new employee announcement, vacation and overtime management, booking resources, and instant messaging.

A scaleable offer

Built on the EverSuite Enterprise Content Management infrastructure, **ES-Portal** enables you to easily add supplementary EverSuite solutions and services, including electronic documents and folders management, email management, reports management, archives and records management, business process Management and web content management.

Based on the EverSuite infrastructure, ES-Portal combines the same innovative technical characteristics:

- A 100% software solution based on industry standards: J2EE, XML, JDBC, SOA
- Ease of integration into your company's information system
- LDAP directory connector
