ATRIUM 3.20 released

Wealth CCC, the Geneva based Information Technology Company specialising in Ultra-High-Net-Worth Individual Asset Consolidation Systems has put into production the latest release of its flagship software, ATRIUM.

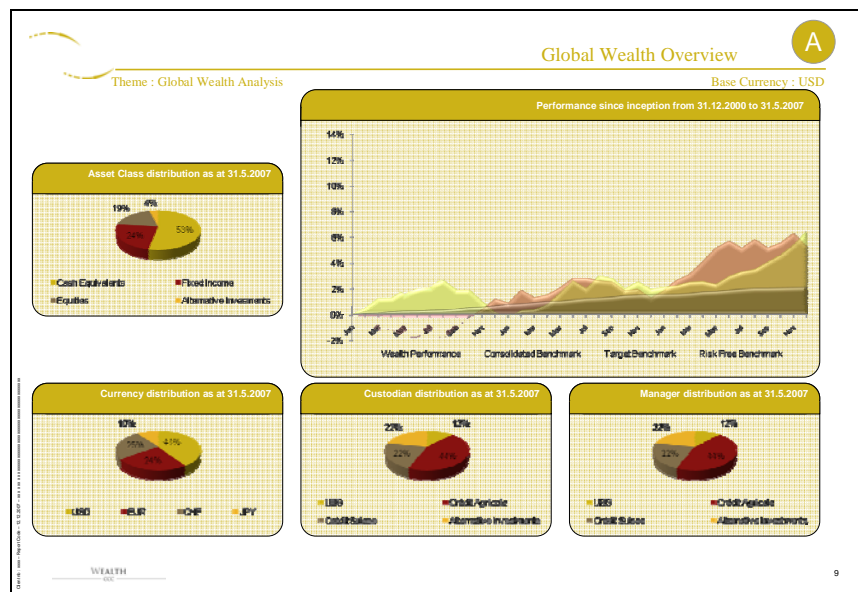

This version, developed specifically for the family office business, manages information on financial liquid and non liquid assets.

ATRIUM maintains information on securities, investment entities, exchange rates, etc... It performs consolidation, treasury, financial and management analysis, performance and contribution analysis, control and compliance checks.

ATRIUM manages a diversity of assets and operations and covers the complexity of significant wealth management.

It captures clients' transactions, and keeps electronic copies of all statements, advices and other documents related to these transactions. It maintains referential information, such as fee schedules, benchmarks and strategic asset allocation guidelines.

This allows ATRIUM to perform the required verifications and controls related to the activity of portfolios by correctly identifying errors and discrepancies

Global Wealth Analysis
 Extract sample of a consolidated report.

Finally, ATRIUM reconciles financial information from a variety of different sources and heterogeneous formats; this provides clients with a truly representative view of their global wealth through precise reports tailored to their needs.

It is currently in use to consolidate and report on assets of over USD 7 billion for Large Family Offices, Private Banking Institutions and Trust Companies.

Wealth CCC is a spin off of M.I.F. a large Geneva based multi-client family office. ATRIUM is developed with the technical support of Solsteam S.A.
